

PROJECT TITLE: Highway Safety Improvement Project - West Carrillo Lighting and Signal Upgrades

WHY THIS PROJECT?

Fully funded by a federal highway safety grant, the Project will eliminate a pattern of nighttime collisions along West Carrillo Street by increasing visibility. The Project will also address a pattern of broadside collisions at the intersection of Carrillo Street and San Andres Street, and increase pedestrian safety and accessibility at the intersection crossing.

PROJECT BENEFITS:

The Project will improve road surface conditions, design and construct roadway lighting along West Carrillo Street, create protected left turn phases at the intersection of West Carrillo and San Andres, and install new curb ramps that shorten the crossing distances on all corners and meet Americans with Disabilities Act standards.

QUICK FACTS

Location: Carrillo Street (between Bath Street and Miramonte Street) and Miramonte Street (between Carrillo Street and Bel Monte Drive)

Design Schedule: spring 2019-fall 2019

Construction Schedule: fall 2021 – early 2022

Total Project Costs: \$2,758,867.00

Funding Source: Federal Safety Grant - Highway Safety Improvement Program and Measure C
